

12th IFAC Symposium on Control of Power and Energy Systems

Rabat, Morocco || July 10-12, 2024

<https://www.CPES2024.org>

CALL FOR PAPERS

ORGANIZING COMMITTEE

IPC CHAIRS

Michela Robba

University of Genoa, Genova, Italy

Kwang Y. Lee

Baylor University, Texas, USA

Mohamed Benabbou

Lear Corporation, Rabat, Morocco

NOC CHAIRS

Fouad Giri

University of Caen Normandie, Caen, France

Hamid Ouadi

University Mohammed V, Rabat, Morocco

Driss Ghani

REDAL SA, Rabat, Morocco

IFAC NMO SAGIP

Hervé Panetto

University de Lorraine, Nancy, France

Contacts

CPES24@unicaen.fr

Copyright conditions

<https://www.ifac-control.org/publications/copyright-conditions>

All publication material submitted for presentation at an IFAC-sponsored meeting (Congress, Symposium, Conference, Workshop) must be original and hence cannot be already published, nor can it be under review elsewhere. The authors take responsibility for the material that has been submitted. IFAC-sponsored conferences will abide by the highest standard of ethical behavior in the review process as explained on the Elsevier webpage (<https://www.elsevier.com/authors/journal-authors/policies-and-ethics>) and the authors will abide by the IFAC publication ethics guidelines (<https://www.ifac-control.org/events/organizers-guide/PublicationEthicsGuidelines.pdf/view>).

Accepted papers that have been presented at an IFAC meeting will be published in the proceedings of the event using the open-access IFAC-PapersOnLine series hosted on ScienceDirect (<https://sciencedirect.com/>). To this end, the author(s) must grant exclusive publishing rights to IFAC under a Creative Commons license when they submit the final version of the paper. The copyright belongs to the authors, who have the right to share the paper in the same terms allowed by the end user license, and retain all patent, trademark and other intellectual property rights (including research data).

CPES addresses all aspects of modeling, operation, and control of power and energy systems, including dynamic interactions between energy sources and power systems, constraint and security control aspects, tools and methods for control system design, test and documentation, real-time simulation and dispatching. Development and application of tools and methods such as modern control theory, artificial intelligence techniques, and data-driven modeling.

Recent increases in demand, production costs, and environmental concerns have triggered the efforts to develop Smart Grids for power systems. Control, information and communications technologies are at the core of the Smart Grid vision as they will empower today's power grid with the capability of supporting distributed two-way energy and information flow, isolating and restoring power outages more quickly, facilitating the integration of renewable energy sources and empowering the consumer with tools for optimizing their energy consumption.

Following the tradition, the IFAC TC 6.3 is planning to organize the Symposium with a number of Invited Sessions & Open Invited Tracks, which are centered on all aspects relevant to Power and Energy Systems Control and aim at bringing together researchers from Academia, Industry, and National Labs to exchange novel ideas, explore enabling technologies, discuss innovative designs, and share field trial experiences and lessons learnt. All accepted papers will be cited in the Scopus database.

Regular papers: Regular papers must present original, unpublished work which falls into the scope of the workshop and must not be currently under consideration for publication elsewhere.

Tutorial papers: Tutorial paper goes beyond the presentation of an original work. It also provides an introduction to a topic or particular technique; eventually with some comprehensive review of the area it covers.

Invited Session Proposals and Invited Session Papers: The International Program Committee encourages the submission of invited sessions with sets of six invited papers on a well-defined subject of current interest. These papers must present original, unpublished work and must not be currently under consideration for publication elsewhere.

IMPORTANT DATES

Initial submission deadlines:

- ▶ **Open Invited Track Proposals** January 5th, 2024
- ▶ **Invited Session Proposals** January 10th, 2024
- ▶ **Regular papers** January 20th, 2024
- ▶ **Tutorial papers** January 20th, 2024
- ▶ **Invited Session Papers** January 20th, 2024
- ▶ **Open Invited Track Papers** January 20th, 2024
