

Information and Communication System Interoperability: Success Stories (ICSISS 2020)

From 22 - 24 June 2020, Meritis will organise and participate in the International Workshop on Information and Communication System Interoperability: Success Stories (ICSISS), co-located with the 22nd IEEE International Conference on Business Informatics (CBI2020) and to be held in Antwerp (Belgium).

Duration : 1/2 day

ICSISS 2020 PRESENTATION

Information and Communication Systems Interoperability (ICSI) aims at providing to two or more systems the necessary means to exchange between, and use functionalities and resources from each other. In many businesses, Information and Communication Systems (ICS) play a crucial role. Many businesses have a plethora of ICS for the most varied purposes such as client relationship management, accounting management, human resources management, risk assessment and so on. In many cases, these ICS have to exchange information within the enterprise or with external partners and their own ICS. Therefore, well design and implemented ICSI project is essential for ensuring the exchange and use of information and resources between the different stakeholders.

For this workshop, we encourage the original applied research contributions sharing and discussing the challenges, success stories, case studies, lessons learned and solutions related to Information and Communication Systems Interoperability.

TOPICS OF INTEREST

This workshop is looking for contributions that describe appropriate approaches and methodologies (but not limited to) the following topics:

- Information and Communication Systems Interoperability (ICSI)
- ICSI Case Studies and Applied Research
- ICSI Design and Development Methodologies
- Best practices in leading, managing and governing ICSI projects

SUBMISSION GUIDELINES

Authors are invited to submit original, previously unpublished research papers. Papers should be written in English, strictly following IEEE style including all text, references, appendices, and figures:

http://www.ieee.org/conferences_events/conferences/publishing/templates.html

Submission must be associated to one of the following categories: (a) Applied Research or (b) Success Story

Recommended paper length is up to 8 pages. Only PDF files are accepted. There is a limit of 250 words for the abstract. Important note: since the review process is double-blind, please make sure that your names and affiliations are not listed in the paper submitted for review.

Papers should be submitted using the conference management system available at:

<https://easychair.org/conferences/?conf=icsiss2020>

The accepted paper will be part of the CEUR on-line proceedings organized by CBI.

IMPORTANT DATES

Paper submission: April 15, 2020

Notification of acceptance: May 03, 2020

Camera-ready copy: May 11, 2020

Author registration deadline: May 11, 2020

Workshop: June 22-24, 2020

ICSISS 2020 CO-CHAIRS

- Gabriel da Silva Serapiao Leal, Phd – Business-IT Engineer at Meritis
- Mathias Payan – CTO of Meritis
